Seeking an entry-level software development position as a recent graduate, bringing strong problem-solving skills, a passion for learning, and a collaborative mindset. Eager to contribute to a dynamic organization, gain valuable industry experience, and continuously expand expertise in computer science.

WORK EXPERIENCE

IT Intern at Lavner Education

July 2022 – August 2022

San Diego, CA

- Instructed introduction to programming, including C++, Python, Java, and web development, to a 10-person class.
- Utilized tools, visualization techniques, and real-life applications to explain complex topics.

Software Engineer Internship at FIRST VALUE TECHNOLOGY

April 2020 – December 2020

Tainan, Taiwan

- Built software for robot arm control and user interface using C++.
- Collaborated with a cross-functional team to enhance functionality and user experience.
- Conducted thorough testing and debugging to ensure software stability.

Projects

Portfolio

April 2023 – June 2023

Crafted a visually appealing and user-friendly portfolio website.

- Created a personal portfolio website using React.js, Tailwind CSS, and JavaScript.

Mood Tracker

Feb 2023 – April 2023

Developed a CRUD web application to track daily mood using HTML, CSS, and JavaScript.

- Designed the user interface for the web application.
- Led meetings with an agile team of 10 members.

Student Web Development Team

April 2023 – Current

Served as a coding leader in a web development team and established a website for a Taiwanese student organization at UCSD.

- Operated the meetings and the debug sessions for the coding team.
- Mentored team members in coding, Git and web development.
- Reviewed code and approved the pull requests on GitHub.
- Implemented and deployed the websites using HTML, CSS, JavaScript and Google Firebase.

EDUCATION

University of California San Diego

Bachelor of Science — Mathematics and Computer Science.

June 2023

Relevant Courses:

GPA 3.65

Advanced-Data Structures, Object-Oriented Programming,
Advanced-Algorithms, Operating System, Web Development, Computer Graphics.

SKILLS

Frontend : JavaScript (ES6), React, HTML/ CSS, Tailwind CSS.

Backend : Python, C++, C#, Java, Node.js, Express.js.
